INTRODUCTION

The purpose of this return to training and playing document is to provide each club, region and District with the information required for them to make an informed decision on their preparedness and ability to resume community sport and club activities.

The guidance and requirements contained within this document are designed to prevent the transmission of the COVID-19 virus amongst participants, coaches, club officials, administrators, volunteers, spectators and the community at large. All the requirements are based on the information provided previously by the AIS ([Framework for Rebooting Sport in a COVID-19 Environment](#)), the National Government ([National Principles for the Resumption of Sport and Recreation Activities](#)) and the amendment to the [NSW Government Public Health Order of Friday 22nd May](#).

KEY PRINCIPLES

Any plan to return to training and playing must also accept the following key points:

- The health and safety of all participants be they registered participants, coaches, officials, volunteers, spectators, friends and family must be the priority for all concerned.
- All the parties mentioned above should be fully briefed and educated on the NSWRL Return to Training and Playing guidelines. Everyone must share some responsibility in adhering to the framework and ensuring the safety of all concerned.
- Clubs, districts and regions must assess the suitability of their current facilities and develop appropriate plans to implement the hygiene protocols, social distancing measures and other requirements in order to minimise the risk of transmission of the disease.
- Training cannot resume until each club has completed the required Safety Plan, submitted it to their District or Group and had the plan approved by the NSWRL
- In this fluid environment, the advice and requirements of government are continually being updated. Clubs, districts, groups and regions should be aware that the requirements in this document may require updating on a regular basis and should be prepared to meet any new conditions in a timely manner.

RESPONSIBILITIES

NSWRL

- Responsible for liaising with the appropriate Government departments and developing the framework in line with the advice provided.
- Developing resources and distributing them appropriately to all Regions and Districts in order to provide education and information on the framework requirements.
- Updating framework document based on changing government advice.
- Manage the approval of Safety Plans for all clubs.
- Manage the archiving of all records of attendance for Major Competition club's training and playing activities.

NSWRL Regions and Districts

- Regions and Districts are responsible for ensuring the educational material and resources required within the framework have been distributed to each club within their boundaries.
- Approving the Safety Plan provided by each individual club within its boundaries.

Clubs

- Appointing a person to act as the club COVID-19 Safety Officer who act as a point of contact for information relating to the outbreak, monitor and deliver the safety plan and NSWRL Framework throughout training and playing sessions.
- Revise the Safety Plan as required to ensure it reflects up to date information in the NSWRL Framework and Government advice.
- Clubs are responsible for ensuring all participants, members and volunteers have received training on the NSWRL COVID-19 Education materials.

COVID-19 Safety Officer

- Oversee the development and implementation of the Covid-19 Safety Plan for their club in order to safely return to sport.
- Review the effectiveness of the COVID-19 Safety Plan and update accordingly.
- Act as the contact point for the clubs registered participants, officials and volunteers- particularly around questions relating to the steps the club has taken to return to be COVID- safe.

Participants/Coaches/Officials/Volunteers

- Ensure they're aware of the NSWRL Framework and the requirements contained within.
- Understand and act in accordance with the club Safety Plan to ensure that all Framework requirements are met, and they can participate in a safe environment.
- Comply with the health directions of Government and Public Health authorities at all times.
- Monitor their health and take all precautions required by law with regard to the reporting of potential symptoms and self-isolation.

FOOD AND BEVERAGE

The return of food and beverage services at community sport organisations should be a staged process in line with the steps contained within the NSWRL Framework document and the NSW Government Public Health orders.

To reopen and operate your business safely, you must have a workplace health and safety (WHS) plan in place to demonstrate the actions you are taking to ensure the health and safety of your employees and customers. This WHS plan, or a summary of it, should be displayed to show that your business is operating safely.

In order to ensure your canteen is safe to re-open, clubs should follow the checklist provided by the Joint Food Regulations System for food business preparing to re-commence pre-restriction operations. A link to the check list can be found [here](#).

Volunteers can still be used in the operation of any canteen at a community club however, precautions must be taken to ensure the wellbeing of those volunteers. A record of volunteers working in the canteen should be maintained, barriers installed in order to maintain physical distancing and consideration given to methods of reducing the requirement to handle cash. As always, good hygiene behaviours and cleaning practices should be maintained.
